~~Abstract~~ ABSTRACT OF THE DISCLOSURE

~~The invention relates to a~~ A ~~pressurized-fluid-consuming device (14, 15)~~ system ~~includes secondary pressurized-fluid consumer devices for drawing pressurized fluid from at least one pressurized-fluid storage reservoir (8, 9, 10), wherein the pressurized-fluid storage reservoir (8, 9, 10) is additionally designed to supply further~~ which also supplies additional ~~pressurized-fluid-consuming devices (11, 12, 13). There is specified a pressurized-fluid-consuming device, whose use permits the design of a less complex and less expensive pressurized-fluid system in a vehicle. For this purpose the pressurized-fluid-consuming device (14, 15)~~ The secondary consumer devices receives a determined value of state of the at least one ~~pressurized-fluid storage reservoir (8, 9, 10) and draws pressurized fluid therefrom the pressurized-fluid storage reservoir (8, 9, 10) only if the value of state reaches at least a predetermined minimum value.~~
